    USERS ||--o{ CLUB_USER : "belongs to"
```

```
    CLUBS ||--o{ CLUB_USER : "has members"

    CLUBS ||--o{ ASSESSMENTS : "undergoes"

    CLUBS ||--o| SUBSCRIPTIONS : "maintains"

    ASSESSMENTS ||--o{ QUESTIONS : "contains"

    QUESTIONS ||--o{ RESPONSE_OPTIONS : "has"

    USERS ||--o{ AUDIT_LOGS : "triggers"

    ROLES ||--o{ MODEL_HAS_ROLES : "assigned to"

    PERMISSIONS ||--o{ ROLE_HAS_PERMISSIONS : "granted to"

    USERS {

        bigint id PK

        string name

        string email UK

        timestamp email_verified_at

        string password

        int status "1:Active, 0:Inactive"

        timestamp last_login_at

    }

    CLUBS {

        bigint id PK
```

```
        string name
        string unique_id UK
        string email
        text description
        string logo
    }

    ASSESSMENTS {
        bigint id PK
        bigint club_id FK
        string title
        int maturity_level
        json report_data
        timestamp reporting_date
        timestamp grace_period_expires_at
    }

    SUBSCRIPTIONS {
        bigint id PK
        bigint club_id FK
```

```
        string plan_type "Elite, Basic"

        string status "Active, Expired"

        decimal amount

        date end_date

    }

    AUDIT_LOGS {

        bigint id PK

        bigint user_id FK

        string action

        text description

        string ip_address

    }
```

2. Data Dictionary (Core Tables)

2.1 Table: `users`

Column	Type	Nullable	Description

`id`	BIGINT	No	Primary Key
`name`	VARCHAR(255)	No	Full legal name of the operative
`email`	VARCHAR(255)	No	Unique identifier and communication node
`status`	TINYINT	No	Binary operational state (1=Active, 0=Suspended)

2.2 Table: `clubs`

Column	Type	Nullable	Description

`id`	BIGINT	No	Primary Key
`unique_id`	VARCHAR(255)	No	Institutional identifier (e.g., GC-4421)

`name`	VARCHAR(255)	No	Official club designation

2.3 Table: `assessments`

Column	Type	Nullable	Description
`id`	**BIGINT**	**No**	**Primary Key**
`maturity_level`	INT	Yes	Derived score from 1 (Seeding) to 5 (Soaring)
`report_data`	JSON	Yes	Encapsulated diagnostic outcomes
