Growing Cents: Git Branching Strategy v1.0

Protocol for managing institutional code nodes across staging and production environments.

1. Branch Hierarchy

Branch	Node Type	Purpose
:---	:---	:---
`main`	Production	Strategic baseline; High Command stable code.
`staging`	Staging	Institutional verification; UAT environment.

`uat/{feature}`	Feature	Tactical development; Individual component audits.

2. Fusion Workflow (Merging)

1. **tactical -> staging**: Only after unit test verification.
2. **staging -> main**: Only after UAT sign-off from Moses/High Command.
