Growing Cents: Multi-Club & Cross-Selling Protocols v1.0

Guidelines for institutional isolation, regional governance, and strategic monetization prompts.

1. Multi-Club Governance

1.1 Subscription Isolation

- Each Club (Institutional Node) requires a unique Subscription ID.
- Data from Club A is strictly firewalled from Club B unless viewed by an L1 (Super Admin) or L3 (Regional Manager).

1.2 Selection Logic

- Post-authentication, users with multiple club associations are presented with the **Elite Entity Selector**.
- Selecting a node initializes the specific dashboard environment for that institution.

2. Cross-Selling & Monetization

2.1 Upsell Triggers

- **Trigger A**: "Low Maturity Score" (30%) -> Prompt: "Unlock Expert Consultation Package".
- **Trigger B**: "Audit Limit Reached" -> Prompt: "Upgrade to Institutional Unlimited".

2.2 Conditions for Report Unlocking

- Successful `charge.success` webhook pulse.
- Assessment status marked as `verified` by High Command.
