Growing Cents: RBAC Model v2.0 (Scenarios)

Building upon the base architecture, the v2.0 model introduces the **Institutional Auditor** layer and simulates strategic access scenarios.

1. The 7th Layer: Institutional Auditor (L0)

The **Institutional Auditor** is a specialized node with read-only "God-mode" access across all clubs for regulatory and quality assurance purposes, without administrative modification powers.

2. Operational Scenarios

Scenario A: Unauthorized Assessment Edit

- **Actor**: Club Member (L6)
- **Action**: Attempt to `PATCH /assessments/{id}`
- **System Response**: `403 Forbidden` - Logic block at `AssessmentPolicy`.
- **Log**: "Unauthorized intervention attempt by Asset {ID}".

Scenario B: Regional Oversight

- **Actor**: Regional Manager (L3)
- **Action**: View aggregated maturity trends for specialized sector.
- **System Response**: `200 OK` - Aggregated Data Blade.
- **Protocol**: Mask individual member names; preserve institutional metrics.

Scenario C: High Command Emergency

- **Actor**: Super Admin (L1)
- **Action**: Activate **Maintenance Lockdown**.
- **System Response**: Global Firewall engagement (Redirect 503 for all L2-L6).
- **Log**: "Command level session lock initiated".
